AS Fire & Safety Double Extension Ladders

Our products are specifically designed to meet the demanding requirements of Fire and Rescue services. AS Fire & Safety ladders are in service in more than 50 countries around the globe .

Designed to meet the modern requirements of the Fire & Rescue Services the AS DX ladder range offers unprecedented stability but still maintaining a lightweight rigid construction.

All of our DX family complies with the requirements of BS EN 1147 and are 3 PERSON RESCUE rated.

Options
There are many additional options for the AS DX ladder range. Please contact a member of our sales team for further information and specific criteria.

Construction & Maintenance
Our unique riveted truss construction method only puts the structure where it is needed, making our ladders high in strength whilst light in weight.

Our ladder construction uses high tensile aluminium extrusions, thus not requiring forming.

Riveted truss construction allows the replacement of any damaged part by Fire & Rescue Services or we can repair at our factory.

Specifications & Use
We build our ladders to the BS EN1147:2010 standard. AS ladders are the mainstay of Fire & Rescue Services both nationally and internationally.
