

Maintenance Training

- Expert instruction and technical support delivered by experienced instructors.
- Hands on, practical learning covering ladder inspection, maintenance, repair and testing.
- Regulatory compliance and Competency certification to BSEN1147:2010.
- Bolt-on courses for other Supply+ products.
- Flexible training options, with established syllabuses and bespoke courses to suit.

Workshop and supervisory personnel involved in the service and maintenance of **+AS Fire & Safety** rescue and access ladders, as well as **+Bayley** rescue and access ladders must be deemed competent by **Supply+** to ensure compliance with regulations (BSEN1147:2010).

To help end-users maintain compliance, **Supply+** offers a range of established syllabus and bespoke training courses to meet your needs.

Fire service rescue and access ladders enable Fire and Rescue Service's to fulfil a core part of their statutory duties. These items of equipment must be serviced in line with manufacturer's guidelines.

Training courses from Supply+

- **+AS Fire & Safety** ladders (BSEN).
- **+AS Fire & Safety** roller and beam gantry set-up and maintenance.
- **+AS Fire & Safety PowerBeam™** gantries; use, servicing, fault-finding, and maintenance.
- **+Bayley** ladders (BSEN).
- **+Collins Youldon** hose reels.

Standard features

The regulation covering the maintenance of fire service ladders is BSEN1147:2010. This requires personnel to be certified competent by the manufacturer. Maintaining competency is key for personnel involved in the maintenance and repair of life safety or mission critical equipment.

Comprehensive and Refresher pathways

Supply+ offers a 3-day Comprehensive course for first-time trainees or those overdue for renewal, and a 2-day Refresher course for those within the 3-year certification window.

Course outcomes

Courses are practical and hands-on. A defined syllabus supports the learning outcomes, with a certificate being issued on successful completion.

On location

Supply Plus is headquartered in Cambridge, UK, in our 6,000m² (64,000 ft²) facility.

Bespoke courses

Bolt-ons available

Each bolt-on is available with the main courses.

- **ELSI retrofit installation**
This course is hands-on, with delegates learning how to convert legacy **+AS Fire & Safety** ladders to include the ELSI upgrade.
- **Apprentices and new hires**
Where delegates require additional support to bring them up to the required level, this bolt-on includes the more basic elements of ladder servicing.
- **Beam gantries (setup)**
Incorrect setup can shorten a ladder's life. This course teaches how to set up a ladder roller gantry or beam gantry.
- **+AS PowerBeam™ gantries (servicing)**
These can be arranged by discussion with our technical teams to match an end-user's installation.
